The screenshot shows the 'Advanced Search' page. At the top, there is a search bar with the placeholder text 'Enter keywords, authors, DOI, ORCID etc' and a search icon. Below this, there are three main sections highlighted with red boxes:

- Search for:** A dropdown menu set to 'Anywhere' and a text input field for 'Enter search term'.
- Publication Date:** Radio buttons for 'All dates' (selected), 'Last: Select', and 'Custom range: Year To: Year'.
- Citation search:** A dropdown menu set to 'Journal' and input fields for 'Year', 'Volume', 'Issue', and 'Page'.

Annotations in yellow boxes provide additional information:

- Yellow box above the search bar: '검색 위치 설정: Title, 저자, 키워드, 초록' (Search location setting: Title, author, keyword, abstract).
- Yellow box next to the Publication Date section: '출판일 설정: 설정한 범위에 출판된 아티클 및 저널이 검색됨' (Publication date setting: Articles and journals published within the set range are searched).
- Yellow box at the bottom: 'Citation search: 저널명, 연도, Volume, Issue, Page 등의 정보로 검색가능' (Citation search: Searchable by journal name, year, Volume, Issue, Page, etc. information).

On the right side, there is a 'Search help' section with a blue box labeled '고급검색 Tip'. The help text includes:

- Author search results:** Search by enclosing the name (first and/or last) of the author in quotation marks.
- Boolean operators:** The Boolean operators AND, OR, and NOT can be applied to search terms.
- AND (also + or &):** Use AND to search for documents containing two or more terms. For example, the following query returns documents containing both cat and dog: cat AND dog. The AND operator is applied by default; for example cat AND dog produces the same results as cat dog.
- OR:** Use OR to search for documents containing at least one of two or more terms. For example, the following query returns documents containing cat, documents containing dog, and documents containing cat and dog: cat OR dog.
- NOT:** Use NOT to search for documents containing a given term. For example, the following query returns documents containing cat but not dog: cat NOT dog.

### Journal overview

#### Aims and scope

Advances in Physics publishes authoritative peer-reviewed research intended for motivated readers with an interest in the perspective of the author.

The journal's scope includes condensed matter physics and statistical mechanics: broadly defined to include the overlap with quantum information, cold atoms, soft matter physics and biophysics.

The Perspectives section complements the regular reviews with occasional shorter, more provocative articles by leaders in their fields in order to

In September 2022 Joerg Schmalian (then co-Editor in Chief for Advances in Physics) made an interesting proposal: he has seen on ArXiv a manuscript by Jan Zaanen, containing what Joerg described as a series of "thought provoking lectures on holography". He proposed that we asked Jan to re-format it into a paper, with the idea of publishing it in AIP after peer review. PGR (then the other co-Editor in Chief) was enthusiastic about the idea, and Jan promptly accepted our proposal. The project progressed rather slowly, due in part to Jan's poor health, but at the end of 2023 we had a final draft of the manuscript. In the course of the review process, Jan became more and more passionate about the paper, though he was keenly aware that his state prevented him from polishing it as perfectly as he would have wanted. Shortly afterwards, we received the tragic news of his death. We were left with a complete manuscript that, no doubt, represents Jan's final contribution on a topic he embraced later in life, but he deeply cared about. Jan's tragic death has prevented us from having what we expected would have been a lively, invigorating, and instructive correspondence in the process of finalising the manuscript. Therefore, we present it here with a minimal degree of proofreading and editing for grammatical correctness, but without modifying the prose style. The result is a narrative in Jan's unique (if occasionally quirky) style, where his personal scientific vision shines
