

How can I connect Google Scholar to the library's resources?

Update your Google Scholar settings to link to the UNIST's collection.

1. Go to Google Scholar click the three horizontal bars in the corner to view the menu

2. Click the cog icon to see Settings

3. Click Library Links and search for UNIST.

4. Check the boxes next to "UNIST - Find it @ UNIST" links

Google Scholar

Show library access links for (choose up to five libraries):

UNIST

e.g., Harvard

☒ UNIST - Ulsan Natl Inst of Science & Tech - ProQuest Fulltext

☒ 울산과학기술원-유니스트(UNIST) - Find it @ UNIST

☒ BIC STAR Library UNIST - LinkHub@UNIST (BIC STAR Library)

☒ RISS4U Catalog, Korea - Find it @ RISS

Online access to library subscriptions is usually restricted to patrons of that library. You may need to login with your library password, use a campus computer, or configure your browser to use a library proxy. Please visit your library's website or ask a local librarian for assistance.

[HTML] Integrins: versatility, modulation, and signaling in cell adhesion
RO Hynes - Cell, 1992 - Elsevier
The recognition of integrins as a widely expressed family of cell surface adhesion receptors is around five years old (Hynes, 1987). At that time, one could identify about ten distinct vertebrate integrins; there are now about twenty, and the number is still rising. Integrins ...

[HTML] Matrix elasticity directs stem cell lineage specification
AJ Engler, S Sen, HL Sweeney, DE Discher - Cell, 2006 - Elsevier
Microenvironments appear important in stem cell lineage specification but can be difficult to adequately characterize or control with soft tissues. Naive mesenchymal stem cells (MSCs) are shown here to specify lineage and commit to phenotypes with extreme sensitivity to ...
