

## A New Model for Open Access Publication

### ACM Open Author eRights Experience

ACM Open에 참여해 주셔서 감사합니다.

이 문서에서는 귀하의 기관에서 저자가 ACM 컨퍼런스나 저널에 출판하기로 선택했을 때의 경험을 설명합니다. 귀하의 저자가 교신 저자(Corresponding Author)로 등록되어 있으며, 원고를 제출할 때 해당 기관의 이메일 도메인을 사용하여 올바른 ACM Open eRights Form을 제공받는 것이 매우 중요합니다.

아래와 유사한 이메일이 각 경우에 해당 원고 작성자에게 전송됩니다:

- ACM 저널 원고 제출
- ACM 저널 원고 승인
- ACM Conference 또는 ICPS Conference 원고 승인

**Subject:** Paper Accepted For Publication in ICPS 2024  
**Date:** Thursday, January 09, 2025 11:36:19 AM

Congratulations on having your paper accepted into the proceedings of 2024 ICPS Conference Your paper will be published open access, in line with ACM's new publishing model for the International Conference Proceedings Series (ICPS). Because you are affiliated with an institution in a country that qualifies for a geographic waiver, you are not required to pay the ACM article processing charge (APC).

Please follow steps 1-3 below very carefully

#### 1. Note the critical deadlines for your paper

- Completion of Publication Release Form: this step is essential for the timely publication of the conference proceedings, so please complete the form as soon as possible (this is part of the Publication Setup process; see step 3 below)
- Submission of supplemental materials such as code, datasets, ppt, etc.: Date is set by Conference

We encourage all authors to become members of ACM. More information on membership options is available [here](#). Additionally, we ask that you encourage your institution to participate in the ACM Open program by [sending this link](#) to your department head or librarian.

#### 2. Check the critical data for your paper

Data pertaining to your paper can be found below. The information below is what will be published in the ACM Digital Library, and so it is essential that you review it carefully to ensure that the data is correct and there are no authors missing or misrepresented. You will have the opportunity to resolve any problems before completing your Publication Release Form:

## Data Validation

**Welcome to ACM's eRights process!** ACM requires that the information displayed on its eRights forms precisely match what is displayed on the final version of this paper. If any of the data below does not meet this requirement, it is your responsibility as the corresponding author to adjust it as needed. The information will then be saved and displayed correctly when you proceed to sign your eRights form.

### Government

Do you or any of your co-authors work for a government agency that claims copyright to this work? (Does not apply to State government)

- Yes, as an employee
- Yes, as a contractor
- No

### Creative Commons License

Selecting a Creative Commons license option means your choice of license will be displayed on the published version of your paper in the ACM Digital Library.

CC-BY is the default CC license and is required by RCUK and Coalition 5 Funders in Europe to qualify for their funding.

- CC-BY 4.0 Creative Commons License** ⓘ
- CC-BY-NC-ND Creative Commons Non-Commercial Non-Derivative License** ⓘ

This work is licensed under a [Creative Commons Attribution International 4.0 License](https://creativecommons.org/licenses/by/4.0/) (https://creativecommons.org/licenses/by/4.0/).

I understand all of the rights and restrictions outlined above.

With the paper attributed a CC-BY license, individuals will be free to:

**Share** - Copy and redistribute the material in any medium or format for any purpose, even commercially.

**Adapt** - Remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as the following license terms are followed:

**Attribution** - Individuals must give appropriate credit, provide a link to the license, and indicate if changes were made. Individuals may do so in any reasonable manner, but not in any way that suggests the licensor endorses individuals or how the licensor's work was used.

**No additional restrictions** - Individuals may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

## Livestreaming and Post-Conference Distribution

A "livestream" is a synchronous distribution of the presentation to the public, separate from the presentation distributed to conference registrants. Not all conference presentations are livestreamed; you will be notified in advance of the possibility of your presentation being livestreamed.

Here you will grant or deny ACM rights to make this presentation more widely seen by way of livestreaming and/or distribution of the presentation subsequent to the event. Those permissions granted and/or denied here apply to all presentations of this material at the conference, including (but not limited to) the primary presentation and any program-specific "fast forward" presentations.

Do you grant permission to ACM to livestream your presentation during the conference?

- Yes  
 No

Do you grant ACM permission to distribute a recording of your presentation as described above?

- Yes  
 No

## Auxiliary and/or Supplemental Materials

ACM considers Auxiliary Materials to be any additional files, including software and executables that are not submitted for review as an integral part of the Work but are supplied by the Author as useful and interesting resources for the reader.

Supplemental Materials are any additional files which form an integral part of the work and are submitted for review along with the textual manuscript.

Will your work be published with any auxiliary materials and/or supplemental materials?

- Yes  
 No

Is software knowingly designed to illustrate technique(s) intended to defeat a system's security included among these materials?

- Yes  
 No

## Third-Party Materials

Third-Party Materials are considered to be non-textual in nature - e.g., figures, tables, graphs, photographs, simulations, music or audio/video clips. (Small text quotations borrowed from a third-party are placed in quotes and cited.) It is extremely important that you identify the copyright holder and secure permission to use each and every piece of third-party content in your paper or presentation that you, yourself, did not create.

If any Third-Party Materials were used for the Work, ACM requires that you secure and document all necessary permissions and/or licenses below. Third-party copyright must be clearly stated in the caption(s) of images or in the text narrative near the object(s) in the Work and in any presentation of it, in any Supplemental Materials, in any Digital Artifacts and in any Auxiliary Materials as applicable. Please do not assume that, since you found it on the Internet, it is freely available to be used.

If you believe any Third-Party Materials used in the Work fall within the scope of fair use, please confirm this by referencing ACM's fair use guidelines here: <http://www.acm.org/publications/guidance-for-authors-on-fair-use> (<http://www.acm.org/publications/guidance-for-authors-on-fair-use>)

Does your paper and/or presentation make use of any Third-Party Materials?

- Yes  
 No

**II - ACM Citation and Digital Object Identifier**

- (a) In connection with any use by the Owner of the Definitive Version, Owner shall include the ACM citation and ACM Digital Object Identifier (DOI).
- (b) In connection with any use by the Owner of the Submitted Version (if accepted) or the Accepted Version or a Minor Revision, Owner shall use best efforts to display the ACM citation, along with a statement substantially similar to the following:

- (d) The Work has not been published except for informal postings on non-peer reviewed servers, and Owner covenants to use best efforts to place ACM DOI pointers on any such prior postings.
- (e) All instances of Auxiliary and/or supplemental Materials included in the paper contain no malicious code, virus, trojan horse, or other software routines or hardware components designed to permit unauthorized access or to disable, erase or otherwise harm any computer systems or software. Furthermore, user agrees to allow ACM to represent any Auxiliary and/or Supplemental Material included in the paper as a First-Class Digital Object.
- (g) Any software included in The Work's auxiliary materials knowingly designed to illustrate technique(s) intended to defeat a system's security has been explicitly documented to state as much.
- (f) The Artistic Images, if any, are clearly and accurately noted as such (including any applicable copyright notice) in the Submitted Version.

**IV - Enforcement**

At ACM's expense, ACM shall have the right to defend and enforce the rights granted to ACM hereunder, including in connection with any instances of plagiarism brought to the attention of ACM. The Owner shall notify ACM in writing as promptly as practicable upon becoming aware that any third-party is infringing upon the rights granted to ACM, and shall reasonably cooperate with ACM in its defense or enforcement.

**V - Governing Law**

This Agreement shall be governed by, and construed in accordance with, the laws of the state of New York applicable to contracts entered into and to be fully performed therein.

I agree to all terms as stated above
